choose to know the fate of their experiments.AN UNPLEASANT SUGGESTION
We have received the following com-
munication from a correspondent:Is not the administration of President
Garfield, a strong evidence that the Vanderbilt
fortune is not wanted in the State of New York?
Is not the government of the United States
desirous to prevent such a man from
holding the office of President?The prominent participation of Mr. Garfield
in the administration of Minneapolis is the
representative of the Vanderbilt interests, and
the most important and most powerful
member of the Cabinet. The Vanderbilt party
will certainly soon to withdraw the
garfield administration.The New York Central Railroad has
been exercised a powerful and predominant
influence in this State, and its interests
have been promoted mainly through the
agency of its present President of the
New York Central Railroad. The
farming population, as well as the city of
New York, has felt the effect of an oppressive
taxation.At the present moment the Vanderbilt
corporation is making a strong effort to
influence National legislation for the
advancement of its own selfish schemes.The Hudson River improvement will add
many millions to the value of property in
this city, give employment to a large
amount of labor and greatly advance the
commercial interests of the metropolis to
the advantage of the whole State. The
Vanderbilt party is working to induce
Congress to call the necessary appropriations
from the State and Stateful bill. The
object is to close the Hudson River
by filling the bed in the construction
of embankment railroad bridges and
the stream. This would not only
greatly retard the progress of the city but
would insure a competition with the
Vanderbilt railroads.In this view of the matter President
Garfield's attitude looks bad. We
would not like to believe that Mr. Garfield
would lend the influence of the administration
to the advancement of the interests of the
Vanderbilt railroads.White riding out yesterday I was
